

How It Works

I operate purely as a concept architect and screenwriter. I engineer the high-retention narrative blueprint—you retain full execution freedom.

1. Concept Selection: Choose a pre-mapped speculative campaign from my portfolio grid below, or brief me to engineer a custom narrative twist for your product line.
2. Blueprint Delivery: You receive a comprehensive Campaign Asset Deck containing the master 30s/45s AV production script, optimized short-form vertical digital variations, visual pacing directives, and copy headlines.
3. Production Freedom: My work ends when the blueprint is delivered. Your internal creative team can execute the script using real actors, traditional animation, or cost-effective Gen-AI video tools—whatever fits your timeline and budget.
